EDUCATION

Rajkiya Engineering College

Bachelor of Technology – Information Technology

Mainpuri, UP

Aug. 2024 – Present

EXPERIENCE

Frontend Developer–Freelance

Nov. 2025 – Jan. 2026

Medical Equipment & Supplies E-Commerce Website

Remote

- Developed a responsive e-commerce frontend for a medical equipment and supplies store using React.js and Tailwind CSS
- Built key user-facing pages including login/register with form validation, product listing with category filters, cart functionality, and informational pages
- Implemented client-side authentication flow with protected routes and session handling
- Delivered a complete, production-ready UI independently within client requirements

Student Member & Event Coordinator

Dec. 2024 – Present

IEEE Student Branch — REC Mainpuri

Mainpuri, UP

- Active IEEE member since first year, contributing to the college's technical community across multiple semesters
- Assisted in planning and managing technical events and workshops at the college level, coordinating logistics and participant communication

PROJECTS

PinchofTaste | *React, Tailwind CSS, Spring Boot, MongoDB, Cloudinary, JWT*

Oct. 2025 – Dec. 2025

[Live Demo](#)

- * Built a full-stack dual-role food ordering platform with separate dashboards for customers and sellers, handling real-world constraints like authentication, image storage, and order state management
- * Implemented JWT-based role authentication for both Customer and Seller roles with protected API routes in Spring Boot
- * Integrated Cloudinary for menu item image uploads with secure cloud storage and retrieval
- * Designed RESTful APIs for complete order lifecycle — cart management, order placement, real-time status tracking, and seller inventory control
- * Built React Context API state management for real-time UI updates across customer and seller flows without page reload

MingoApp | *Next.js, Spring Boot, MongoDB, WebSocket (STOMP), JWT, Tailwind CSS*

Mar. 2026 – Present

- * Building a real-time one-to-one messaging app with WebSocket using STOMP protocol on Spring Boot backend
- * Implementing JWT authentication, message persistence in MongoDB, and online/offline user status tracking
- * Designing responsive chat UI in Next.js with Tailwind CSS — mobile-first layout with live message delivery

TECHNICAL SKILLS

Languages: Java, JavaScript, C, HTML, CSS

Frontend: React, Tailwind CSS, React Context API

Backend: Spring Boot, REST APIs, JWT Authentication

Database & Cloud: MongoDB, Cloudinary

Tools: Git, GitHub, Postman, VS Code
